

ABBOTS HALL OUT OF SCHOOL CLUB

ALLERGIES

On the inside of the Afterschool club cupboard in the kitchen area, there is a list of children with any allergies and or medical conditions.

All staff are informed of any children that attend the club sessions of their allergy and what it might be. Staff are always able to access the information should the need arise.

More in depth information about the allergy, medical condition is stored in a folder with a photo of the child and all important information we might need if an emergency might arise.

This information is updated yearly when new annual registration forms are completed by parents, or when we are informed of any changes to the child's health, allergies, or medical conditions.

We always have a member of staff on duty that is first aid trained.
