ABBOTS HALL OUT OF SCHOOL CLUB

INTERNET, SOCIAL NETWORK

Abbots hall out of school and holiday club offer computers and tablets for children to access the internet to complete homework or look up information.

The clubs computers are connected to the main school internet and Wi-Fi, this has a number of restrictions making access to certain websites impossible due to age and appropriate material content.

The work computer is also connected to the same Wi-Fi but with different settings, this computer is protected by a password which only the Manager and Deputy Manager know.

All of the clubs computer histories are checked regular by the club manager, and reported to the committee and school should anything be discovered within the History.
